Re: *Ex Parte*, WT Docket No. 10-4

Dear Ms. Dortch:

This is to inform you that on October 13, 2010, Lloyd Meese, President and CEO, and Michael Rodgers, Founder and CTO, of Wireless Extenders, Inc. ("Wi-Ex") and the undersigned met with Tom Peters, Roger Noel, Joyce Jones, and Moslem Sawez of the Wireless Telecommunications Bureau, and Bruce Romano and Ira Keltz of the Office and Engineering and Technology to discuss issues related to the above-captioned proceeding pertaining to the use of signal booster devices used by consumers of commercial wireless services.

We discussed Wi-Ex's signal booster products, including the steps taken by Wi-Ex to ensure that its devices protect the integrity of carrier networks by not causing interference. We also discussed the need for wideband boosters as a consumer product, and noted the demand for such devices indicates a need on the part of consumers to enhance their ability to use the wireless services they have paid for. We noted that laboratory testing of boosters through existing FCC equipment authorization procedures is a practical and reasonable way to ensure that boosters available to consumers do not interfere with wireless carrier networks. Finally, Wi-Ex expressed its desire to work with the FCC, other device manufacturers, and wireless carriers to

determine standards that protect wireless carrier networks while allowing manufacturers to meet the important consumer demand for devices that enhance consumers' ability to receive wireless signals where they live, work, and play. Further details regarding these topics are available in the attached presentation which was made to the FCC staff listed above.

Please direct any questions regarding this matter to the undersigned.

Respectfully,

A handwritten signature in black ink that reads "T. Devendra Kumar". The signature is written in a cursive style with a horizontal line underlining the last name.
